EIRELE JOVEN BOTER

Software Engineer — Web Development · IoT Smart-Device Development · AI Engineering
Mandaluyong, Philippines · eirelejovenboter2@gmail.com · linkedin.com/in/eirele-joven-boter · github.com/eirele01

PROFILE

I develop enterprise systems end to end: web, IoT and AI, from the first conversation to the live deployment. Operations manager and seafarer turned engineer — different decks, same job: keep complex systems running under pressure.

EXPERIENCE

2019 – present	**Software Engineer** — Freelance full-stack from 2019; IoT and enterprise systems at Tensei Philippines Inc. from 2024.
2016 – 2019	**Seafarer, Able Seaman** — Kept complex systems running under pressure, far from help.
2014 – 2016	**Operations Manager** — Ran day-to-day operations and learned how businesses actually break.

SELECTED PROJECTS

Reservation PH — reservationph.com
Multi-tenant SaaS booking platform for service businesses: real-time scheduling, PayMongo payments (GCash, Maya), loyalty programs, automated email notifications, analytics dashboards. *Laravel 12, Next.js, Inertia, Tailwind CSS, ShadCN, GCP.*

Duff Street Clinic — duffstreetcomplex.com.au
High-traffic, mobile-responsive site for an Australian medical centre with 50+ doctors: online booking, telehealth access, dynamic service directories. *WordPress, Elementor.*

BrilliantPOS — brilliantpos.com
Multi-tenant SaaS point-of-sale with cloud inventory replenishment and workforce management, used by 250 retail and service businesses. *Laravel 7, Tailwind CSS, MySQL, cPanel.*
